

Record Pregnancy Intent for Female and Male Patients

Clinicians can now record a patient's pregnancy intent by selecting from the new **Pregnancy Intent** field in the **reproductive health** section in **Patient Chart**. In addition, new responses for **Pregnancy Status** will be available, which include "possible" and "unknown."

Pregnancy intent information will be added to the following reports:

- Clinical Documentation Report
- Assessment Report
- Chart Report

NOTE

The **Pregnancy Intent** field will also be available for male patients.

Setup

No setup is required for this feature.

Workflow Changes

This feature is available through:

- Enterprise Clinicals > Patient List > select patient > Patient Chart > Reproductive Health

The screenshot shows the 'reproductive health' section of the Patient Chart. It includes fields for 'Last Menstrual Period' (date input), 'Pregnant' (radio buttons for Yes, No, Possible, Unknown), 'Lactating' (radio buttons for Yes, No), and 'Pregnancy Intent (Over the next year)' (radio buttons for Yes, No, Ambivalent, Not Sure, Unknown). A red box highlights the 'Pregnancy Intent' row, with a callout pointing to it stating 'Select **Pregnancy Intent** from the available options.' Another red box highlights the 'Save' button, with a callout pointing to it stating 'When done, click **Save**.'
